

Create a clear, simple, and well-labeled flowchart for “Hostel – Room Allocation – Feature Set III”, suitable for a BCA 1st-year college project.

The flowchart should include the following steps in proper sequence:

Start

Enter Student Details – Student ID, Name, Gender, Mobile Number, Course, and Address.

Enter Room Details – Room ID, Room Number, Room Type, Capacity, and Available Beds.

Check Room Availability

Decision: Is the room available?

Yes → Allocate Room to Student.

No → Display “Room Not Available” and select another room.

Store Allocation Details – Allocation ID, Student ID, Room ID, and Allocation Date.

Update Available Beds after room allocation.

Enter Hostel Fee Details – Fee ID, Student ID, Total Fee, and Due Date.

Enter Payment Details – Payment ID, Amount Paid, and Payment Date.

Check Payment Status

Decision: Is full payment made?

Yes → Display “Paid”.

No → Display “Pending/Partially Paid”.

Display Student, Room, Allocation, Hostel Fee, and Payment Details.

Stop

Use standard flowchart symbols:

Oval → Start/Stop

Parallelogram → Input/Output

Rectangle → Process

Diamond → Decision

Arrows → Show the flow
